

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

March 23, 2000 LB 936

been misled about it who are going to come running with their hopes on a piece of paper and say, give me some money, and they're going to be told, you don't qualify, you can't get this money. Then, once again, the Legislature has misled people. And I don't believe any substantial businesses are going to want to take...

PRESIDENT MAURSTAD: One minute.

SENATOR CHAMBERS: ...advantage of this bill by opening a business in a place where the population is going to continue to dwindle. And the...I'll...I don't know, if they make a product I don't know who they expect to sell it to. They're not going to sell it to people out there who don't have any money anyway. This bill is doomed to failure, in my opinion, but the success is not going to be reckoned in terms of how many people it helps but how much political mileage can be gotten by saying rural Nebraska has now been saved. I think I have one more time, Mr. President? Okay.

PRESIDENT MAURSTAD: Thank you, Senator Chambers. Senator Stuhr, on the advancement of LB 936.

SENATOR STUHR: Thank you, Mr. President and members of the Legislature. I support LB 936 and I support it because I believe in this state we need to be realistic. We need to be realistic in the type of businesses that we can draw and industries, and that is basically the small businesses, those that can't qualify for LB 775 funding. Small businesses that this bill addresses are really the fit that we're looking for in the rural areas and we need to create those jobs and I think it's important that we have a bill such as this. Senator Chambers, no, this may not be the entire answer, but it is another tool, as we've been saying all session, in the toolbox, and we need as many tools as we can in rural Nebraska to assist in keeping the people there, to bring back some of our young people and we need to have those small businesses because I think those are the fit that really we need in Nebraska and particularly in the rural areas. We can't have rural sustainability unless we have some jobs, and that's why I'm supporting LB 936. Thank you.
